JavaScript	C#	.NET	Angular	Node	Visual Studio/Jira
Test Automation	Agile Development	Git	Continuous Integration		

Experience

Software Engineer in Test — April 2016 - Present

ENGIE (formerly Retroficiency) — Boston, MA (Remote since 04/2017)

- Test Engineer for the Energy Efficiency project, a SaaS that provides a deep analysis of a buildings overall energy usage and savings opportunities
- Joined during the startup phase, responsible for creating and maintaining their first test frameworks
- Implemented continuous integration pipelines with slot deployments and failure rollbacks
- Setup a Selenium Grid and configured Hub/Nodes to run tests across different operating systems and browsers
- Worked with developers and product owners on functional requirements to consistently deliver a quality product

Software Engineer in Test — January 2015 - April 2016

Fidelity Investments — Durham, NC

- Test Engineer for the Money Movement team, supporting Fidelity's financial transaction systems
- Designed and executed automated end-to-end, integration, and regression tests in JavaScript for cross-platform (desktop, tablet, mobile) and cross-browser compatibility
- Worked in an agile environment and practiced scrum

Education

Ohio University — Athens, OH

B.S. Criminology — May 2014

The Iron Yard — Durham, NC

Ruby on Rails Bootcamp — December 2014
